

INSTRUMENTATION FOR OFFSHORE VESSELS, OSVs, CTVs, SOWs, etc.

Instrumentation Systems for Offshore Vessels

WISE Group can deliver a comprehensive range of instrumentation, systems and services suitable for a wide range of Vessels, such as: Tug Boats, Pilot Vessels, Crane Vessels, Supply Vessels, Crew Transfer Vessels, Accommodation Vessels, Barges etc.

- Marine Wind sensors and displays
- Weather stations
- Environmental Monitoring Systems
- Helideck Monitoring Systems to comply with CAP 437
- Vessel Motion Monitoring Systems
- Motion and Vibration monitoring sensors and systems
- Dynamic Impact Monitoring Systems
- Structural Strain Monitoring Systems
- Meteorological and Oceanographic sensors and systems
- Gangway Monitoring Systems
- LIDAR Wind Profiler Systems
- Data loggers and data acquisition systems
- Data analysis and reporting

Environmental/Helideck Monitoring Systems

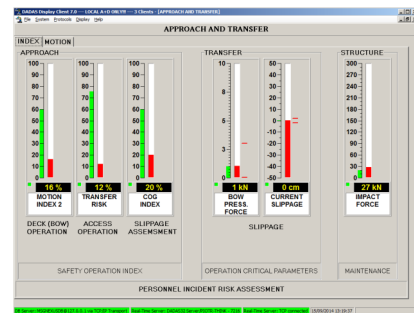

Often known as EMS / HMS systems, Weather Stations or Metocean systems are a very important tool for weather-critical operations onshore and offshore.

Systems using the well proven DADAS software from A+D have been in use offshore for more than 20 years and have an excellent track record.

Vessel Motion Monitoring Systems

We can deliver sensors and systems for monitoring 6 DOF for vessels and platforms for a wide variety of offshore applications.

This can also include specialized systems for monitoring of dynamic impact and for monitoring seasickness on smaller vessels.

Service work and calibration services

We have a qualified team of offshore service engineers, including experienced support engineers onshore, who can undertake service work on all makes and models of Metocean systems, EMP/EMS systems, HMS systems, meteorological and oceanographic sensors, etc. Our workshop is equipped for servicing and calibrating most kinds of sensors and instrumentation.

We can also provide a fast track supply line for spare parts and upgrades for existing Metocean systems.

Turn-key instrumentation projects/Project management

We can take full responsibility for all aspects of offshore instrumentation projects from design of the system, engineering, system integration, installation, commissioning to long-term operation, maintenance and data management.

Contact WISE Group for more details!
